

Key Features

Advanced Detection Intelligence provides Powerful Protection

- **IMPROVED!** Built on a **modular architecture** which utilizes a diverse range of technologies that detect, block and remove threats attempting to compromise your PC.
- **NEW!** **ThreatFire™ Behavioral Intelligence** features next-generation technology to block new threats faster than traditional signature methods.
- **IMPROVED!** Advanced **rootkit detection technology** identifies and removes hidden threats from your PC.
- **NEW!** **Multi-layered browsing protection** against web-based attacks, including phishing attempts, rogueware scare tactics and silent drive-by downloads, using a combination of reactive blacklists and proactive dynamic content analysis technologies.
 - **IMPROVED!** **Site Guard** blocks you from visiting potentially unsafe or phishing websites and from downloading threats through your browser, IM or email.
 - **Cookie Guard** automatically removes potentially malicious tracking and advertising cookies.
 - **NEW!** **Browser Guard** stops 'drive-by' downloads of fake AV or malicious files from compromised or exploit websites.
- **Constant real-time IntelliGuard™ protection** prevents known and new malware threats before they can install and cause any harm to your PC. IntelliGuard™ monitors for malicious activity involving spyware processes, tracking cookies, suspicious ActiveX objects, browser hijackers, keyloggers, trojans and more.
- **Intelli-Scan™** swiftly hunts and kills active spyware threats – utilizes patent-pending spider scanning technology to quickly identify and remove threats.

Tackles today's attacks... and ready to take on tomorrow's new threats

- **NEW!** **ThreatFire™ Behavioral Intelligence** features next-generation technology to block new threats faster than traditional signature methods.
- **Behavior Guard**, built on ThreatFire's patent-pending **ActiveDefense** technology intelligently scans and analyzes computer processes to accurately detect and block any malicious activity.
- **Smart Updates** silently and automatically install protection updates and product upgrades to ensure powerful protection against the latest threat outbreaks.
- **24/7 Global Malware Research Centre** constantly tackles the latest threat types and implements new innovations and technologies to quickly combat cybercrime.

Precision Technology for minimal performance impact

- **NEW!** **State Awareness Modes** intuitively detect how you are using your PC and adjust to minimize performance impact and reduce interruptions.
 - **Game Mode** automatically detects your PC switching into full-screen mode for games, movies or presentations and ensures an uninterrupted experience.
 - **Idle Mode** automatically runs resource intensive tasks when your PC is not in use.
 - **Power Saving Mode** postpones power-intensive tasks until your laptop is plugged in, extending battery life.

Tailor to meet your specific needs

- **Intelligent automated protection** is automatically enabled on install, enabling you to set and forget.
- **Tweak advanced settings** to tailor protection to meet your specific needs.

Additional Features

- **NEW!** **Protection Statistics Report** informs you of how PC Tools has protected your PC over the last 30 days.
- **24/7 Help available in 10 languages.** Select the most convenient option to you – reach our support* staff by phone, email, live chat or web.
- **BETA!** AOSS Rescue CD available.
- PC Tools Spyware Doctor is available in 27 languages.
